“How to save our Environment”

Our environment is very important to us. Many things that we are using to survive in everyday life we get it from our environment but why is it we are not doing something to save our environment. Why it is there are still people who continue to do things that are harmful to our environment.

There are many ways for us to save our environment just by simply throwing garbage properly can help save our environment and proper disposal of hazardous waste, and by using the 3R's which is recycle, reduce and reuse can help save our environment all of us can do our part in saving our environment. We should take an action now before it's too late.
