World Peace, a word that said everything. However, it is Possible? World Peace is possible but almost impossible. We have to create a new World with new human being that they would never fight and they would live as a family, in peace an harmony to finally find the dream of every pacifistic. "The World Peace". World peace is almost impossible because of the money, the power, and the envy between the people.

Money, is the responsible why we do not have peace in the World. In our world is almost impossible to subsist without money. Money is a bad necessary need in our daily life.

The problem is what people do to obtain richness. Money is the responsible for most of the biggest wars.

Another reason that makes World Peace almost impossible is the envy between people. Envy is a killer thing that people have in their minds to destroys other personal life.
