What is world peace?? We always hear this word through television, radio, people, as well as in paper works and thousands of articles written by different people yet, we do not know what this word really means. Peace is something everyone wants, but no one exactly knows how to achieve it. As an individual and a citizen of this country, it is important for us to know our role and part in achieving this world peace.

World peace is an ideal of freedom, peace, and happiness among and within all nations and/or peoples. Someone has appropriately said “Peace is the mother of progress”. Understanding and respect are very necessary to bring peace into the society. Once people start understanding each other, they would begin developing high viewpoints about the others. Respect usually comes automatically through understanding. Respecting other people includes respecting their nature, beliefs and culture too. We have these popular sayings that if you respect others, others will respect you back. Being patient and understanding every situation in life are the main aspects we should consider to develop a good relationship to others. Having a good relationship to others and self-respect will surely be valued by other individuals. It is necessary to first have peace inside ourselves and our home. This will naturally allow us to be peaceful in the outside world.

Achieving peace is very possible. It must start within us. Inner peace of all people is an important precursor to world peace. As the word by Alberto Romulo “We have come together in the true spirit of multilateralism to send a message to all the peoples of the world. We are here to say we want peace - not tomorrow or the day after tomorrow but today and in our lifetimes. And we are here to say we can achieve this”.
