Would you like to live in the world where kindness, friendship, and love rule? Everyone would like to. Still, is it possible? If it is possible, how can we achieve this goal? How can we make the world a real paradise to live in?

Peace is something that everyone seems to want, but no one knows how to achieve successfully. The key to attaining worldwide peace is this simple formula: Peace = Understanding + Respect. Peace is defined as the absence of war or other hostilities. Understanding, in this situation, is defined as knowing and being tolerant of another's point of view. And finally, respect is defined as a willingness to show consideration and appreciation for the beliefs of others.

In order to achieve a world without war and hostility, you need understanding and respect. Without understanding and respect, we have nothing but a world full of intolerant individuals, each concerned only with their own beliefs and ideals. We currently live in a world full of selfish people that believe that their way is right, and anyone else's way of thinking that differs even slightly from their beliefs is wrong!

Most of the leaders wanted power not for the benefit of their country but for self supremacy and self interest. how can the world attain peace if, Too many countries have too much military power and don't want to give in to any other country. War is something that the world is going to have to deal with because there has been very few years over the history of the world that have been war free.

To discover whether or not world peace is truly able to exist we must define what is meant by the peace. If by world peace we imply Utopianism, we perceive a conflict-free society. This may be seen as improbable due to the changing in circumstance and action of human beings. But in order to be a conflict-free people it would either require us to be totally independent from one another or to lose our individuality, which characteristically makes us human.

We should take the step now to create a better peace not a destruction..
