Peace starts within us. If we had peace in us we start the day peacefully and happy. We can have peaceful relation with persons around us every day. If we have peace in ourselves, it would be easy for us to mingle with our family, friends and community.

When a particular place is having peace among the constituents, trouble is impossible to happen. The government has the main task of promoting peace in the country.

It has been reported in the television that the government of a particular country always do their best to maintain the peace and order in the place.

When peace is already established in a group of place, people from different tribe would have the good access to good governance, economic status would grow. Freedom of speech among people is realized. Global competition is successfully held. There will be business sectors come to establish business in the country. They will not hesitate to give financial aid to the country that needs support. When peace is established worldwide, love is possible to happen among countries. When there is peace, there is love. Why don't we have peace in us so that we would have love around us and live peacefully?

But in the real sense of life, peace is very hard to acquire especially when an individual doesn't have peace in him. Peace is hard to establish when an individual doesn't want to start the day harmoniously. When peace is not within him, world peace is hard to gain.

For world peace possible to gain, we should start it in us. The governments take a vital role in promoting peace in the country so that it would be easy for us to acquire peace globally.

The youth should be the sector to attend seminars and workshops regarding world peace. They should be the first one to be acquainted how peace is promoted.
