What is meant by the word peace?- Peace as its universal meaning is the absence of chaos and the presence of unity, love and understanding. Peace stands first within ourselves because if we love ourselves then it would not be difficult for us to share our love to others.

Peace on the other hand, globally would mean as global solidarity. Some may say that it is hard to attain world peace. But if we only enlighten our minds to its advantages, peace would totally exist. Love, respect and unity to oneself and to others would mean peace. Love, understanding, respect and unity are the counterparts of Peace.
