

## **“Why do we have to save the Earth?”**

Ramirez, Eimee C.  
School of Allied Medicine  
Universidad de Zamboanga  
Zamboanga City

We need to save the earth all because earth is the only planet where people can live. Earth is our first home without the earth we are not here. As god created the earth is beautiful. As we can see in our place, there are a lot of creation that god has made. Many people now are destroying our nature like cutting the trees in the forest. That's why we are now suffering from flash flood. In order to avoid that, we need to have cooperation, unity to save our nature or the earth. We have to conduct a tree planting so that we can avoid from a calamity. We have to save the earth so that in the years to come, our earth is still intact. Deforestation is one of the best things in saving our earth. Planting trees in our place is the best to avoid from any calamities.

Saving our nature is good and we do hope people can help also in caring our earth. But like in our country many rivers are destroyed by humans because they throw their garbage in rivers and oceans. Also factories are throwing their waste in the same place. We has to save our nature because someday over earth might lost, so we have to take care of it. We must take care of it as what we are doing to our self.
