

WHY DO WE HAVE TO SAVE THE EARTH

Aborido, Cathy Claire J.
BS Nursing
Universidad de Zamboanga
Zamboanga City, Philippines

We are all living in a beautiful and colorful world and we are very lucky for that. Earth is our home that we need to protect and maintain its balance to avoid destruction of it. All life is interconnected, it is impossible for people to separate themselves from each other, the earth or many living things on the earth. When we lack respect for environment and the earth, we are inevitably damaging ourselves as well. The health of the earth defines our well-being and the damage we do to the earth is often return upon to men.

The earth is hospitable to mankind because of the balance maintained in the environment. And because of that we should all save the earth because we are threatening that balance and so harming ourselves and our future. If this balance is disturbed in any major way, the planet could become uninhabitable to future generations. Save the earth for it is a precious gift and we are blessed with it in which we can grow and thrive. It is important to save and appreciate the beauty of earth and the opportunity that the earth offers us, and in turn work to respect the earth and conserve its natural wonder and beauty. We should make wiser choices, we should and we must protect and save our earth in order to live healthy. As a part of this world we have a very large responsibility in saving and maintaining the wonder of the earth. If we disrespect the earth we are just the one who will be more affected of what might be the effect of it to us. If the earth will be destroyed we can't blame anyone but ourselves by not taking care of our own home.

Remember Mother Earth is our only home, so as part of it do save the earth to maintain its balance.
