When we heard world Peace what comes to our mind is that everyone is involve, not only your country but he whole earth. It is very hard to have a world peace. First and foremost you need to start to have a peace within ourselves, with heart and soul. Because every decisions you make it needs to start within you, then second you need to have peace within your family, friend and love ones.

In our world today there are lots of struggling, everyone fights, everyday you can hear through the news, radio about terrorists and everyone is afraid. Last week I heard about the news in United Kingdom and other countries they warned foreigner of going here in the Philippines because of terrorists, threats and others, so it is really hard to have peace in our world.
