Universidad de Zamboanga

Zamboanga City, Philippines

We might forget how the song “**Kapaligiran**”(environment) describes our country. It is no longer as beautiful as it was and much worse, it continues to be like a neglected mother. As we try to observe, our place may get even worse compared to how it is describe in the song. Just by looking at our environment, floods always heard in the news and sizzling hot of the sun, we will see that it does not only happens in our country. We may not see it with our own eyes, but there are a lot of changes that is happening globally. If we just only open our eyes and ears, we would realize that we have been living in a hazardous place. A place that is alien to us because everything was not like this before. And to think, we are the ones who cause these. If we have been very careful with all the wastes that we produced, things may have been better. The environment that we have now might be of danger to our health. Before everything turn into a dangerous place that we are all afraid of, let’s start doing what is right. We must try to save our mother earth .We can never be too late if we start now. There are a lot of things that we can do and we must start with our self. The little things that we can do everyday can mean a lot to our nature. We must not neglect the only place where every one of us can survive. Let us love and respect our mother nature.
