Zamboanga City, Philippines

Mother Earth is where people live. Mother Earth provides the needs of the people. We have to take care of our Mother Earth, because if we will take Mother Earth for granted, many tragedy will occur, like for example we need to plant more trees to replace the trees that had been cut and had been used by making papers and other useful materials and also those who make kaingin or farmers, we teach them not to cut trees so that we can prevent landslide and flood. Like what happened in Manila, during typhoon Ondoy, many people died, many houses are destroyed. It's because we forget to take care of our Mother Earth. And also we should not capture the animals that are endangered, so that our ecosystem will be balance.

And also we need to educate those who are illegal loggers miners not to abuse our natural resources and also we need to teach the factory owner to throw their waste in a proper waste and do not pollute our air and also we need to conserve energy, like for example, we conserved energy by not using all the appliances if not needed and then use water wisely because if we continue to do so, we, people will suffer the consequence.
