

## **Mother Earth**

Faith Marie  
Technical High School  
Universidad de Zamboanga  
Zamboanga City, Philippines

Mother Earth is our home because we are in the home of mother earth we need to protect our mother earth. Mother Earth is about that in hand of every human who live here. Mother earth is a home for humans, animals, and even things that have life. Our planet named earth is a beautiful planet where more people can live happy with their family. We need to take care our mother earth because our life will be affected with how will we take care our home that god gift us. But how will we take care or what are the ways to protect Mother Earth?

This is a instrument for us that god gave us to really know how will we protect for maintaining the good model of our Earth and to maintain this we need to avoid doing things that can affect the islands, beaches and even our home. I will protect mother earth because I love my home and I don't want to lose it. Many ways that we can stay are earth beautiful, full of colors like planting trees, plants and do not be selfish because it is considered our life because without home it is very lonely living with no colors and doors that we want to open. If we will not take care of it we ca possibly lost our family, home and the ambitions that we want to reach and I want to share my experience for having a beautiful earth with the next generation of my life so that they will have interest to do or make things to maintain the shape, model and life's that we care rinse we are in the generation.

So don't wait if there will happen a bad time. So you need to take care to have a good life and prevent cutting trees to prevent landslide to maintain the safeties.
