Zamboanga City, Philippines

It's about time to give back to our wonderful planet by taking good care of her ...

Do you know her? So if not, this is the time you will know her, especially those who destroyed her. Mother earth is the only planet that gives us substance, life for the living things. Human can only breathe only in this earth. God created this earth for us to live, and He gives one of us a responsibilities, this is responsibilities of taking care of our mother earth, because we are the one's who live in this planet, so, we should do something to save mother earth from further destruction and also we human also need her, because she's the only planet who gives life to the living things, specially human. I can say that , in this world, the population is now growing and still in dangerous and our harmful pollutions is indeed choking her slowly and continues to stripped her with her ozone layer. I think it is about time to give our timely response to this alarming state of the only planet we live in, by doing our own share of protecting her with doing simple things that will surely stir big difference., as a student, I can say that, there is no impossible if we all work for it. All we need to do is to respect her care her and love her, because she's the one gave us life. I hope someday our world will be at peace I hope that all of us will not only reli to our President NOY-NOY AQUINO to work it all. I hope that all of us will participate..
