

## **“Mother Earth”**

By: **Ron Christian Salvador**  
II- Mariner, Technical High school  
Universidad de Zamboanga  
Zamboanga City, Philippines

Just before mankind came to earth, God make sure that we will have a conducive place to live. He provides clean water, land and air. His next greatest creation after human is our environment. Nature provides us everything; it serves as our resources to produce everything. Before civilization mankind’s way of life is simple- from simple resources it is then converted into food and other necessities. But, it didn’t stop there for man has to satisfy his unlimited wants, technology was then introduced to make life easier. These are the days of higher buildings but shorter temper, these are the times when we have multiplied our possessions but reduced our values, and we’ve done larger things but not better things to destroy our environment. Despite the fact that the world has been polluted, but now is the day of reforms – not to continue doing what technology’s side effect but to save the mother earth. These are the days to change narrower viewpoints and be an instrument to save mother earth and its preservation. It’s never too late to change! All you have to do is to take one step at a time and the first step lays in you and what you can do.
