

## **“OUR PRECIOUS EARTH”**

By: **Christian Van Teodoso**

Technical High school  
Universidad de Zamboanga  
Zamboanga City, Philippines

Our Mother Earth is the most precious gift that God has given us. It is the only place where we, humans can live. Earth has all the resources humans need like water, shelter, food, land, air, heat, light and protection. These are some of our most common needs that our mother earth possesses. Long ago our mother earth was clean and fresh. Wherever you are, you can breathe fresh air. You can even imbibe right from the waters of the river, lake, falls and many other more. The animals live freely with their habitat. Especially our forests were copious and virgin.

But now, our mother earth is abused and shattered. We are the ones destroying our mother earth. We tend to meander and obliterate the right and natural flow of earth, because of civilization, technology and our infinite desires and needs. The forest had been devastated. Trees were cut and have not been replaced. Rivers were contaminated because of the illicit throwing of waste and garbage's. Animals had gone extinction because of illegal hunting. All of these were mad by us.

We are the ones responsible for the destruction of earth so, we are also the ones who should clean, revive and preserve our mother earth. It is our responsibility to protect and conserve our mother earth not only for us present generations but for future generations as well. There is only one earth. So we must protect it. It is our only home, our only land.
