

Peace Through Unity

By: **Fatima Sukayna M. Masillam**, BS in Respiratory Therapy,
School of Allied Medicine
Universidad de Zamboanga,
Zamboanga City, Philippines

In our daily lives, we are contented in living without questioning what is happening in our surroundings. Most of us don't see or blind to see the wrongness of this living. Even though we are like this, we can't escape the reality that there is happening that we don't want to exist and pretend like nothing's wrong.

I, as an ordinary college student, can notice the wrong happenings. Just like an ordinary fight of a Muslim and Christians, even if it is ordinary, this way you can see there is no unity between the two. In other words, if this practice will continue, it will start into an endless war.

We student are here to study in school in order to communicate to other people, make friends with them and also to be part of an educated world. We know better than the others, we are the model to a better future. Through this, we can contribute to the world peace, with our simple way we challenge our selves to be better and learn unity.

They say that Muslims and Christians can't live together, they were wrong, and we will prove to them, here in Mindanao we unite together, as a family. Even though sometimes, they fought but this is happening only in a family war. We can prevent all of wars by just a simple smile and communicate well with others. Know the capacity and attitudes of others, be patient and understanding to one another.

In order to reach this goal, we have to cooperate with one another to help create a peaceful life, not only in our selves and also to everyone.

All of us want to live in a peaceful and harmony life, but we are not fighting for peace and unity, we just keep on escaping in reality. Although fighting is not a peaceful way, but through this we can achieve peace.

Unity of people in the country, this is the key to a peaceful life, not suffering on a war. "Stop the war" bring peace to everyone; for the future living. They were so many victims during the world war here in Philippines; many were killed, most of them are women and children. Those innocent children were killed, without knowing and see their future. What if one of them is your child? It was a torn in a heart of a mother; what if we were one of them? What can you feel as of now?

We have to do something, and it will start within our selves. Can you differentiate the peaceful country and the not peaceful country? People in a peaceful country have unity, caring and understanding with each other. They have also love for their people that brings happiness; while the other one is no unity and so very useless.

I want to stop this.....
