As students, we need to cooperate by showing to our teachers that we are striving hard, and participating in school activities. We need to help other people even in a simple way, accept some suggestion from others, and not be selfish, think also about other people. If they will give some comments and ideas, we should know how to accept it. There is nothing wrong if you accept it .We should learn how to give and take.

To achieve this unity, we must be as one, be humble, and never let anyone to fall down. If you have some skills share it, so that others will appreciate you .Unity is the solution for all of us .We should be responsible, we should know how doings are, we should work hand in hand in order to pursue the things we wanted.

As a Filipino citizenship we need to have these characteristics;

1. Hospitable
2. Respectful
3. Determined
4. Well-organize
5. Well-Disciplined

Because if we have this, we can succeed, we can help our country, we become progressive and we can be a good influence to anyone.
