For every child in this world has a right to educate his/her self in formal education. It is the responsible of every parent to educate their children, to give them the right life and right education. As a parent they should plan the future of their children if they can afford it. The rule of the child as a student is to study hard, give attention to his/her performance in school. He/she must know how to manage his/her time in terms of academic and extracurricular activity. The student also has the right to be treated as equal like other students.
