As a student, I have the right to express my answer in what way I can express it, for instance, a situation on the classroom, the teacher gave us a question that can be answerable base from the book/module or base from our self-explanation and I answered it base from my understanding and how the teacher violated my right as a student in the way that if he/she cannot accept my answer or idea of what I wrote on the paper or maybe in oral if he/she keeps on saying that my answer is wrong but it can't be like that he/she must accept my answer in a way that I answered it base from my understanding because every teacher must not say that the answer of the student is wrong maybe he/she can say that you have a point.
