

LOVE THE EARTH

Masillam, Fatima Sukayna M.
BS Respiratory Therapy
Universidad de Zamboanga
Zamboanga City, Philippines

God made the earth, with its beautiful land and water. It has also a wonderful nature living with animals. The humans have been created by God, human is the most important living creatures that God had created. But, why do humans destroy God's creations? Do they have any rights to destroy it?

Within the nonsense doing of people, there are also who are to help prevent this kind of act. In just a simple way, you can help to save the earth. In just tolerating yourselves you can prevent diseases that come from the pollution. Act as a leader in your barangay and form a group of cleanliness and orderliness in your barangay. Avoid burning of plastics; it will deteriorate the ozone layer. If you love yourself and your love ones, learned also to love the place where you live. Loving the earth is just a simple way but more people you can help in each of the good things you've done to your surroundings. Love also the animals which is part of the place you willing to protect. Love the people, in such a way that it is just like your friends.
