It should be all Filipinos unite for the sake of development of our country. This will happen if all people discipline his/her self and should cooperate in all activities or program in this country like supporting in sports, health care program and helping all Filipino youth in terms of education.

If all this happen development in our country will come true. We should help our country develop and must be proud who do their best for our country. I hope the government does own strategies to help Filipinos who are jobless.
