Environment is anything that exists in this earth. You can find sea, river, lakes, mountain, trees and many more, this part of environment plays an important role in our daily living. Like for instance the tree that serves as a shade and its fruits as a food. The river as water and everything has their own roles.

In our generation lots of technologies exist that brings advantages and disadvantages. They cut trees or as the make furniture like chair, tables, and woods for us to make a house. But we forgot the true essence of nature that we are abusing it. So, how to save environment? We can make it in simple way. As a teenager you can save by not throwing garbage anywhere and participating organization that maintain the cleanliness of our surrounding.
