Zamboanga City

Environment is very important in every individual because it is where we live and survive so we need to take care of it. Today, in our new generation. I observed that our environment was not progressing anymore because of the selfishness of the other people. They used to destroy our environment specially our nature. So as a young lady, I will save the environment by promoting a good civilization to my countrymen.

The number one problem that I observe in our environment was the over populated of our country, it is the reason why there is no progress in each of the family, our progress will start in every family because it is the basic of the society. So how can I help? I will promote family planning to the family to avoid over populated in our country and to help them to have a better life.
