

How to Save our Environment

Marlyn Magbologtong
Bachelor of Science in Radiologic Technology
School of Allied Medicine
Universidad de Zamboanga
Zamboanga City, Philippines

In order to save our environment, we should stop illegal logging to avoid natural disasters. We should also stop burning of plastic to avoid global warming. Help save our environment by keeping it clean.

We should also take care of the ozone layer so that we will not suffer the hotness of the sun. We need to recycle, reuse and reduce so that we can minimize garbage pollution to save our mother earth.
