

## **How to Save the Environment**

Pandia Nadal  
Associate in Respiratory Therapy  
School of Allied Medicine  
Universidad de Zamboanga

If we think it is difficult to save the environment because there are so many people who destroy then those who try to save it. We need to cooperate as one and build programs like those in Manila, in Pasig where they cooperate to save the river and their environment in every barangay. They need to maintain the cleanliness, and observe proper waste disposal. In so doing, we make life easier and longer. Enjoy our life!
