

## **How to Save the Environment**

Sherhana A. Hari

Bachelor of Science in Radiologic Technology

School of Allied Medicine

Universidad de Zamboanga

Zamboanga City, Philippines

People are the ones who destroy peace and in so doing, they are the ones who can revive it. People are the cause of the damage of the environment. Save the environment by planting a tree, and stop throwing garbage anywhere. Planting a tree is very important to save our environment.

Respect the environment and treat them as a human being because they will also hurt us if we continue to destroy them. They also have a heart.
