

How to Save the Environment

Zandrachelle Ladjalani

Bachelor of Science in Radiologic Technology

School of Allied Medicine

Universidad de Zamboanga

Zamboanga City, Philippines

Environment is very important for us people. People have to take care of the environment and there are many ways to save it. These include cleaning our surroundings as it helps a lot and is the best way. Second, is the smoke emitted by vehicles, and burning garbage or other materials that destroys Mother Earth.

Keep the water always clean, and remind the people from the community through signage's that says "Keep our community Clean". We should also avoid cutting down trees since they prevent soil erosion. Keeping the people informed about saving our environment is a big help.
