Universidad de Zamboanga  
Zamboanga City

Our mother earth is our lives, we are all learning here all people are loving each other, they are united, they took care of our environment, our world are peaceful before, all are happy. But how it came into opposite.

People are quarrelling just because of small thing, our environment are now in danger because of what people did, we must help our mother earth, the earth is our mother she took care for us, she protect us, and we must take care for her without our mother earth we cant' live and without our mother earth. We cant live and without our mother earth we are nothing. And as a person we must love her. We should be united and we should love our family and also all living things who leave in this earth.
