Every human in this world were born equally with rights. But sometimes the rights of people were not given an attention, that's why there were people become bad. Every situation must be clear, we must see both sides who are in a good side. But there were times the people become abusive because even though they have the rights they we it in a wrong way. Such as some incidences here in the Philippines.

So, every human has the rights in terms of what they want and what they didn't want. And also additional for Human Rights is the Homosexual discrimination. There were people who are homophobic, they didn't respect the homosexual one. The homosexual people just need a respect for themselves. Indeed human right is equal and fair.
