Zamboanga City, Philippines

Peace is defined as the union of happiness, love and understanding of each culture and beliefs. Peace is a way of caring our love ones and also to our society. Through peace we can have a good relationship and leadership in our country.

Peace is now missing in our country. How can we promote peace in our way? What is the use of Peace? When is it needed?

Nowadays, peace is not present in our society, some people fight for a small matter, some people kill for their own purpose. These are not the essence of peace. We should promote peace and start it in our own self and implement it to others and let them imagine in a country or in the planet where peace is the first rule. Through peace we can have a good environment, a better government, and a clean and safe planet to stay. This is the real essence of peace and peace is needed every time, anywhere and as always.

Implement peace in the whole world, for a better country and gain a good economy, friends and relationship.
