Peace is the mother of progress. Without peace a nation cannot make progress. So peace is ever desirable. If there is no peace, the whole human race will be destroyed because war in our generation involves bombing and killing of people's lives. Because of this, war should be avoided to achieve world peace. However, some say that it is impossible to achieve it because of money, power and envy between people. In our new world it is hard for us to survive without money so, how can we stop war if money is one reason why we have war? Money is a bad influence in our life. Sometimes when we rise in the morning and listen to the radio or read the newspaper, we are confronted with the same sadness like violence, crime, wars, and disasters. We cannot recall a single day without a report of something terrible happening somewhere. Even in these modern times, it is clear that one's precious life is not safe. But even when we are hopeless in achieving world peace, let us find ways or way to lessen the crimes and violence. We should understand each other's opinion, respecting other people, respecting their nature and culture because if we respect others, others will also respect us. Patience and understanding are the main aspects we should consider for us to develop maturity in our behavior. We must also be non-aggressive, keeping our attitude calm and peaceful for us to make right decisions.

Harsh speech and insulting words always bring quarrels and conflicts. We must avoid anger and hatred towards other religion, culture, status and country. We must have equality for it is the most important thing in order to bring harmony and understanding in our world.

If we are human, others are also human beings. If we have so many feelings, then they too have. Being polite and behaved will never hurt other people. So, equality should be established and God should be the center of our lives. Educating people will create less conflict and easily understand situations. Thus, educating people may also achieve world peace. These are just a few ways on how to lessen the problems that will make us build a better world although it is not an answer to eradicate conflict.
