World peace this is what we aim for. This is the ideal of happiness and peace among people individuals and even in all nations. So, how can we achieve peace in the world? It must begin within us. As we can see in today's situation of our worlds. The people were keep on fighting, from other country to another. We can only have peace in the world if we will end global and regional wars. Of course with the help of the superior in that certain county.

Unity and peace must be as one. Unity will lead the people to be one mind and heart. Individual must respect one's opinion to prevent conflict and hatred. All in all we must have peace in the world to have peace in mind.
