

Human Rights: Reflection on Morong 43
Carlos Conde

Universidad de Zamboanga
Zamboanga City, Philippines

In releasing the said “Morong 43” under humanitarian is one of the excellent way for it to show and let the people know and feel that the Philippine Government is concerned in terms of human rights. It is made with the purpose and to remind every individual that we have to respect each of every individual no matter what his position is, even he have done things in which has a huge bad effects towards people surrounding him. Justice is also made to let the lawyers judge and defend the person whom they are extending their help and service; it is also a place for the victims to prove to themselves and other people that he’s not guilty upon the said crime.

In this case/situation, the policemen and soldiers should have check first the owners of the house before making the arrest, but for what raiding team did, they already violate the rules in arresting.
