Zamboanga City, Philippines

In my own opinion based on the articles written regarding about Human Rights I can say that not all the articles stated is doing so fine. Because as I observed especially in times of troubles and weaknesses some of this articles is useless. Many people suffering from dead and cruelty they cannot express their feelings, their emotions most especially the justice that they want. Now a days if you are belong to a lower class or what shall we say you are coming from poor family you cannot achieved the rights as a human or you don't have power to do anything because you have no money to work and to pay for it. So the question is, where is the human rights?

As a student or as a youth in the community I have so many dreams that I want to fulfill but this dreams will remain as a dream. Due to scarcity of money, being a poor man. And also most of now are unemployed due to slowly progress of our country. Many people lose hope they going to go to other place because they know that it has a big opportunity waiting if you are going to work from other place or from other country. So do you think in this situation we have gain the human rights that we want to achieve here in our country?

Some human rights are being ignored by our government officials. Because sometimes the right of a person being not use due to have no power to mandate other people. In a public schools, public Hospital or any other agency under by the government some of this Do not recognized you most especially unfortunate people. You need to show money before you are going to entertain by the employee or staff.
