Universidad de Zamboanga  
Zamboanga City, Philippines

Now and then we see people striving hard for a daily income and for common needs in their survival. In the hardships that they experience some of the needed things that should be given to the child is being lessened. Their children have been deprived in going to school, to learn more knowledge and to be a productive citizen of the country. Commonly this situation happens for those in native provinces or the primitive old way of system even in cities may do so. In line with this, Education is one of the basic needs of a child, without education he/she cannot fulfill the dreams that they wish. It has a big impact to the lives of the people. The very common problem for this is money, no sufficient funds in purchasing the things and transportation in going to school. Second, No school at all. The Government has been abandoning these rural areas in which they become deaf to the important needs of the Indigenous people. Lastly, is the attitude of ours that is being recognized by some. If we are eager to learn we should find a way and make some sacrifices that we lead us to success.

Our rights in Education that is being implemented by the institution, stating that we people have the right to learn and to know the things behind us. As the statement goes like this "Youth is the hope of our Fatherland". We can make a difference. The government should be prioritizing the unfortunate ones who are eager to learn and reach their goals. They can build a day care center for the children it is a best start already and lending books to them so that even they are at home they are still fun of learning. As the time goes by, more youth are engaged to their future. No one will be behind they will find Education as their own lives. They will know the importance of Education on how it will change their usual life. The day we were born and the time we will die, we don't stop learning and it is the only thing that our parents can give to us. The most precious thing which is "Education".
