Let me say about human right I know. One of the human rights I've learned is that "The right to the fulfillment of such vital needs as food, shelter, health care, and education." And to analyze it all, it is the basic need of a human right.

Not all people had these basic needs, especially for those poor people because of poverty, people get suffer for all the problems that our country had. For example, a child has a right to have a family that it is not broken because it is not easy to get raised from a broken family. The mental affections of a child from broken family bring him/her to the future of his/her life. In other words, the past life of a child brings him/her of what he/she could be in the future.
