#### HOW TO SAVE OUR ENVIRONMENT

These are several ways to save our environment for simple things we can help our environment to keep will contribute for so called “ CLEAN AND GREEN ENVIRONMENT” it seems single but some of us just throw their garbage’s anywhere they want. It’s a big no! because, our health. People live in the poor environment as respiratory infection and many more, and it may leads to death.

So as early as possible we should make our environment clean and green before it will comes to regrets. Through proper disposal of garbage’s is our way to help our environment and also our health from any complication so that all of us stays healthy at all time.
