Universidad de Zamboanga  
Zamboanga City, Philippines

A wonderful life is what I'm wishing for. A peaceful night where I can sleep well and nothing to worry about. I want a peace in our country. But there's human being who commits a crime just because of poverty. Because of lacking in educational attainment they can't find a nice job where in you can saves money.

The reason why we are not progressing its because in the absence of peace. It starts with ourselves to achieve peace. Lets cleansed our bad doings and promote peace. No more bombing here and bombing there if we have a progressive and rich country. The only way to brighter future is to finish the education so that we rather our country will no longer suffer the different crimes.

Peace is in our hands. We have to make peace in our soul and so that we can achieve what we are wishing for. Peace is just like the absence of war. We will stand as one and promote peace. Lets do what is right or wrong. Lets start a new living.
