Zamboanga City, Philippines

Many of the students now a day go to school just to have some fun. But they did not realize that they are just only wasting their time. Why they are just making fun of school? Why are they not concentrating in their study? They did not know that education is the one that can help us in the future. But, still some of the students do the unnecessary things that can get their attention in studying.

Then, why do we have to go to school? Why we are here in school? Why we have time to go to school? Unfortunately, we are here in this institution to gain knowledge so that someday we will not become ignorant and also so that we can get a better in the future. Because when the time comes we will become responsible enough to face our future family or future life.

When the time comes we are already old. This is the time we will realize that education is very important in our life. Because by this time we can remember the foolishness things that we do when we are young like not entering the class, playing online games that brings us to become lazy and have a worse future. That's why there is a saying repentance comes last.
