For me peace is have no war. If have peace in the world we live in are good life if we want have peace we should not get angry , like an example we talk with each other , should be our talk is slow and we do not shout with listener and another peace talk we should listen to the speaker that's why we have a peace.

Peace we can have more find in this world like when we need a help we shall used word please and be humble so that they help you with true help that's why we can get peace.
