Human rights in health we experiencing now negative system in our hospital services because some of the hospitals here in the Philippines are lacking of good doctors less nurses and facilities cause less of funds giving by our government so lots of our doctors and nurses are transferring to other country because big salaries to offer and some of the public hospitals here are very poor cause lacking also of doctors and not good in services that's why many dies in public hospital cause no good equipments to use rooms to use and no good doctors and poor services also. Cause they have no such hospitals tools to use to our patient and many can't afford to pay hospitals bills so many of our people get more sick because we lacking good hospitals here to help everyone

Hope our president must help our public hospitals to be standard like in private hospitals because many of us can't afford to admit to private hospitals so everyone can't cure if there's big problem to their health
