

POLITICS

Aljean Faye Mateo

College of Business Management
Universidad de Zamboanga
Zamboanga City, Philippines

Some of the politicians are abusing the dignity of other people; they are using their powers to used people in some bad things. Wherein, Mostly of us are being victims of their commands. Usually they used their positions as to assist of who they are, regarding their attitudes most of them are being selfish and having some favoritism. Like for example in a way of having a better city of their respective place, they used to force people to vote them and with matching under the table also.

Some civilians also are tolerating of this kind of works of the politicians. So, we have to fight this for the better economy of our future. The people that in need of help or the people who are being innocent they might come to be a victims, As for me we should help our country become progress and out of the doing bad thing and don't be too lazy in making some works.

If some don't like the things that they have done they should have actions on it or report their works. By this time when people tend to report their wrong doings, They will actually become alarm from it and avoid making some necessary vices things wherein they made it as a habit of their lives.

Politicians also have to train to become more faithful for their work, because as I observe they used to do things in their own good. Without knowing it is the wrong doings by the eyes of God. So, Before will left anything until it is earlier we should on it.
