

## **How to Save Our Environment**

**Yim, Po Ling**

School of Allied Medicine  
Universidad de Zamboanga  
Zamboanga City, Philippines

Can one person help save the environment? Can this one person slow the global warming? Yes, each one of us, in our own little ways can save Mother Earth. I for example by just simply segregating biodegradable from non biodegradable waste. I can help lessen pollution which is one factor for manmade calamities that we are experiencing now. By recycling and reusing non biodegradable waste. I can help prevent global warming, which is caused primarily by burning plastics and papers, and lastly by simply walking my way to school. I can help to lessen air pollution. Advantages are I can save money and become physically fit But I also helped saved the environment.

If all of us are thinking the way I do, we can save mother Earth from destruction, there still a way, if we walk hand in hand.
