Zamboanga City, Philippines

Every human being has their own rights and this is one of the major reasons that exempt us from the other beautiful creations of God. We are indeed rational and we are unique. With that, I believed for us to be able to maintain and preserved each rights of every individual we have to identify the different factors that block our path way from enjoying our rights at the same time we have also to take a look and find ways on how can we justify our rights without going beyond the limitations that could step down other's boundaries.

As a Filipino citizen, it is indeed our obligations most especially the parent, who should send their children to a school or institution which will nurture the youth knowledge and wisdom with regard to education. Every individual has the right to study not just to gain knowledge but to develop values that will serve as a key to unlock immature attitudes of the individual as well as to have a bright future. But, ladies and gentlemen we cannot put aside the facts that we are fortunate enough to afford to educate ourselves most especially the poor one.

With this, I do believed that for us to be able to help the unfortunate but the deserving one, the government officials together with the fortunate Filipinos we have to join hand-in-hand in producing more scholarship programs. We have to put in mind that it is very important to sustain the hunger of the youth with regard to education for just like what Dr. Jose Rizal point out youth is the HOPE of the motherland.
