Universidad de Zamboanga  
Zamboanga City, Philippines

Our planet Earth is beautiful and perfect for us to live. There are three elements on Earth for us to survive; land, water and air. Sometimes we forgot to take good care these essentials elements, maybe because of our high technologies; we were blind of new knowledge, expertise.

Here in the Philippines, We were ranked No. three of the most polluted country around the world. It is very negative on our part; we were no. 3 in making our earth sick and add to its dying state. We should do something to help minimize and later on vanish pollution.
