School of Allied Medicine
Universidad de Zamboanga
Zamboanga City, Philippines

Peace is rarely seen in today's world. It is hard to imagine a peaceful world in today's situation. Wars are experienced in almost every part of the world. Even in our country, peace doesn't exist. Then how can we be at peace with other nations and have world peace if we don't have it in our country?

Peace starts within us. We should have peace in our hearts by means of contentment. We should be at peace with others also, especially those who mean so much for us. If peace is already in ourselves, then we can do better things for the nation. Instead of doing evil and starting fights, we can be friend everyone through speaking in good terms and accepting the fact that each and everyone is a unique person, thus possessing unique characteristics and thinks differently. All we need to do is respect their ideas so as not to create trouble.
