Peace is a worth that must reign from ourselves, home, community, country and the entire globe, where we're living. We students are studying in various universities or school not just to study our desired profession but as well as to begin friendship and socialize with the different kind of moods or thought with others, share moment with peers and to meet strangers. Peace is the only 'noise' the world wanted to hear, a silent noise that would pleases the people, free from war and violence **WORLD PEACE** is best explained by the global eradication of corruption, no crimes due to the altruism of each being. It is the act of killing the causes that begun the wars and selfishness, the reason why we still stand up, fight and never give up. Can we just live in this world given by the Almighty with love and peace?? Please be guided and think of it. We must value and given the true essence of unity and peace
