World peace is a commonly debated issue among today's society. Questions that arise are: Will it ever be attained? When? Is it even possible? These questions have reached the minds of everyone, with a variety of opinions. Political status, culture, and belief all affect their beliefs. Everyone has a different thought, and no one really knows. We have to create a new World with new human being that they would never fight and they would live as a family, in peace an harmony to finally find the dream of every pacifistic. "The World Peace". World peace is almost impossible because of the money, the power, and the envy between the people. The problem is what people do to obtain richness. Money is the responsible for most of the biggest wars. For example, as the day of today, The United States army is fighting in a war that has only one reason: "Oil". Oil is equal money, a million of paper and coins.

War is a conflict between countries thru the use of arms. War costs hundreds of lives, may it be innocent or not. Killing people for whatever reason is not right. Obviously, the war we are having right now is a different kind of war. Another reason that makes World Peace almost impossible is the envy between people. Envy is a killer thing that people have in their minds to destroys other personal life. Mother Teresa once said, " Peace begins with a smile." I absolutely agree! It's said that a smile can light up a room, so imagine what a world of smiles can do. If everyday, someone does something kind for someone, it will create a ripple effect. Now, think of world peace. If someone apologizes to someone else, and they do the same, imagine what we can achieve!
