UNIVERSIDAD DE ZAMVOANGA
ZAMBOANGA CITY, PHILIPPINES

When do say that we already committed world peace? Peace is the only Way we can make our live harmonious, calmness, tranquility and as well as silence. For me to be called as world peace not just typically means “no war”. Peace is started in a small place that understands, unite, and communicate each other.

Peace is also started in a small group of people or we can say a family that understands, forgive each other .and it connects to the community where they have respected, love and care for Mother Nature. I hate such people destroying our forest which can help us preventing from flood and will give us fresh air as well as a shelter for our endangered species. If we learn first to love and respect our selves this wouldn't be happened the problem in us humans we don't have care for our surroundings. We just only thinking for the sake of our own happiness. Without realizing that every actions and decisions that we are making our mother nature is suffering. We can only realize this if everything will have lost. So as early as now start loving every little thing in us. Because we are just a visitor in this world. Our just almighty one will judge in the end.
