Peace is a freedom from quarrels and disagreement. It makes a relation harmonious among people living on earth.

World Peace is a phenomenon where each of the people living on earth has understanding, have its freedom, have happiness with their lives of living, cooperating each other to prevent war. Nations having agreement of resolving violent acts and establishing a peace and sincere living between each nation. This is a kind of peace where people united.

It is nice to hear and good to feel what world peace brings into our lives. But, when this can be happen? When this can be started? Does it need sacrifice? These are the question that goes out into my mind that makes me curious.

As a matter of fact, we people living on earth knows how to have a peaceful life, a better life, a harmonious living but, were just neglecting the fact. We are just fooling ourselves doing crazy things, doing crimes, committing corruptions. This is just an effect of our true color. Our countless ambitions and desires with those things that are worthless. We are not aiming of the things that will last long.

World Peace can only be happen if only, there is peace in ourselves. There is a saying “I am the beginning of every change”. If we wanted changes to have a peaceful world, peace must begin with our selves.

In every change, there is sacrifices. A sacrifice that will level up the real world to have a peace. We must sacrifice all our hatreds, our prides, our hesitations to have a peaceful and grateful living.

As part of our lives peace is always there, no matter what we do but, we must strive hard to have a peace in our self so that we can make the world peace.
